

CV Centre

Our CV centre allows you to proactively search for the ideal candidate from among thousands of registered candidates with a broad range of profiles.

The StepStone CV Centre offers you a variety of ways to guarantee you the results you need:

“Quick Search”

With the Quick Search feature, in just a few clicks you can consult our CV database, based on a simple selection of search options.

“Detailed Search”

As its name suggests, this search engine allows you to search for candidates based on any of the criteria included in their CVs.

The following criteria are offered for candidate searches: professional experience, specific knowledge or know-how, personal details, training, language skills, long-term aims, preferences or keywords.

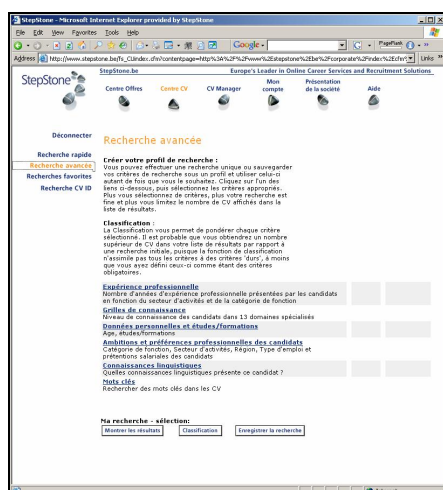

“Ranking”

This option is designed to take you straight to the best profiles! Each CV in the results list receives a score based on the criteria specified for your search. The candidates who best fit the profile you are looking for are placed at the top of the list.

You can save your CV search in the “Favourite Searches” section, for easy retrieval in just one click. If you wish, you can also activate the “CV Agent” function. The CV Agent helps you save time and ensures that you never miss the best candidates by automatically sending you new or recently updated CVs that match the profile you are looking for.

From the result list, you have the option of directly contacting candidates by email. You can also select the candidates that you would like to take onto the next stage of the recruitment procedure, and place them in a specific folder (“CV Manager”).
